

A photograph of three business professionals (two women and one man) in a meeting. They are gathered around a table, looking at a laptop screen. The woman on the left has long, curly brown hair and is wearing a dark blazer. The woman in the middle has long, wavy brown hair and is also wearing a dark blazer. The man on the right has short brown hair and is wearing a light blue striped shirt and a dark tie. They are all smiling and appear to be engaged in a collaborative discussion. The background is slightly blurred, showing what looks like a modern office environment with large windows and other people working.

APPLICATION SERVICES

**Efficient Application Services
Aligned With Business Vision**

In today's global business environment, increased stakeholder expectations and increased competition requires reliable, high performance applications to ensure efficiency.

GSS Infotech's Application Services enable you to leverage new technologies, proven platforms, internet power, ubiquitous mobile devices and new business and delivery models that increase competitive advantage.

Application Development Services

GSS Infotech Application Development Services are cost-effective, innovative and aligned to customer business needs. We can help you with requirements definition, specifications management, design, development, testing and integration of software across multiple platforms and technologies enabling your new systems to perform seamlessly in your existing environment.

GSS Infotech provides domain expertise and in-depth technical skills required for custom application development. With our experienced developer base, robust infrastructure, and state-of-the-art development workbench GSS Infotech deploys a business oriented approach to develop high performing, modular and maintainable applications.

GSS Infotech's Global Delivery Model helps to deliver high quality business applications that increase operational efficiency, lower cost of ownership and enhance your competitive advantage.

Business Solutions

- Cloud Enablement
- Custom Applications
- Portals
- Product Development
- eLearning
- Content Management
- System Integration
- EAI and SOA
- Customer Management

Application Services

We create high quality business applications that help organizations increase operational efficiency and sustain competitive advantage.

We offer cost-effective and innovative application development and maintenance solutions aligned to customer business needs.

- Application Consulting
- Custom Application Development
- Testing
- Quality Assurance Services

About GSS Infotech

GSS Infotech provides enterprise level technology solutions that focus on driving business efficiency and reducing total cost of ownership. Founded in 1999, GSS Infotech operates worldwide through offices in the U.S., India and the Middle East. We provide customized and cost-effective solutions to customers, focusing on Infrastructure Management, Cloud Enablement and Application Development.

Application Maintenance Services

GSS Infotech Application Maintenance Services help you get the best out of your existing IT applications. Our services span service desk, incident and problem management to corrective and preventive maintenance, and performance improvement.

GSS Infotech's consultative approach takes a holistic view of your business, technology roadmap, information architecture and processes to deliver improved application support. With minimum downtime, we help your applications stay optimized to provide rapid response to key changes and business requests.

Application Transformation Services

Enterprises today need to support thousands of applications concurrently with multiple interdependencies. An upgrade or modernization of one application may cause system downtime or interruption of work.

Application Transformation Services from GSS Infotech help you with a smoother and simpler transformation of application portfolios without compromising quality or losing time. Our automated processes, proven tools and methodologies help in rationalizing, modernizing and extending the application

portfolio of our customers. Moreover, we help organizations prepare for the onslaught of new devices, mobile platforms and applications.

Testing Services

Applications with defects often lead to interruption in work which affects business continuity. Developing defect-free applications is a painstaking and often cost intensive activity. The investment is often disproportionately high when compared to application design and development costs.

GSS Infotech offers services to develop a test strategy, design and execution techniques that enable efficient cost and resource management.

Our testing strategy is based on the risk and value of application functions that protect critical production applications with comprehensive regression testing.

Through life-cycle process utilization, we accelerate time to market by ensuring that defects are identified early, thereby reducing rework and the associated costs. Our software testing automation helps customers to achieve zero human errors, boosting productivity and delivers secure and defect-free applications.
